### PROFESSIONAL SUMMARY

---

Software Developer with experience building backend APIs and travel technology integrations for flight search, pricing, booking, reconciliation, and client onboarding workflows. Skilled in C#, Java, Python, ASP.NET Web API, REST APIs, SOAP/XML, gRPC, JWT authentication, MongoDB logging, caching, polling, and production troubleshooting. Strong in API design, third-party integrations, technical documentation, client communication, and improving backend reliability and scalability.

### TECHNICAL SKILLS

---

**Programming Languages:** C#, Java, Python

**Backend & APIs:** ASP.NET Web API, REST APIs, SOAP/XML, gRPC, JWT Authentication, API Documentation, Third-Party API Integration

**Databases & Caching:** MySQL, MongoDB, Redis

**Cloud, AI & Concepts:** AWS, RAG (Retrieval-Augmented Generation), Data Structures & Algorithms

**Tools & Practices:** Git, Log Management, Error Handling, Caching, Polling, Cron Jobs, Debugging, Production Support

**Soft Skills:** Client Communication, Team Collaboration, Mentoring, Leadership, Problem Solving

### PROFESSIONAL EXPERIENCE

---

**Corefares Consulting Private Limited | Software Engineer** | Jan 2025 - Present | Bengaluru, India

- Integrated TravelFusion SOAP/XML APIs for flight search, pricing, and booking, adding error handling, caching, and polling to improve reliability across booking workflows.
- Designed and developed Xstream, the company's core RESTful API platform, enabling third-party integrations with JWT-based authentication and clear API documentation.
- Built Developer Corner with API usage guides and implementation resources to improve partner onboarding and reduce integration friction.
- Implemented MongoDB-based log management with compression, full-text search, and dynamic decompression to support faster diagnostics and production issue analysis.
- Enhanced backend workflows for Branded Fares and Technical Stops while optimizing existing services for performance, scalability, and system stability.
- Supported clients during integration, UAT, and go-live by explaining API workflows, request/response structures, authentication, and troubleshooting production issues.

**Trinetium Tech Private Limited | Associate Software Engineer** | Jun 2024 - Dec 2024 | Bengaluru, India

- Developed and integrated backend services to enhance application functionality and improve user experience.
- Identified, debugged, and resolved codebase issues, improving application performance, stability, and reliability.
- Implemented a flight reconciliation cron job to streamline data processing and reduce manual reconciliation effort.

### EDUCATION

---

**MCA**, Birla Institute of Technology | 80.55% | Aug 2022 - Jun 2024

**BCA**, Maharshi Dayanand University | 71.73% | Aug 2018 - Jun 2021

### CERTIFICATIONS

---

- Java with DSA, Spring Framework, and Spring Boot - PwSkills
- Communication Skills - TCS iON
